

CELL BALANCING

CRUCIAL TO ENDURANCE

CELL BALANCING IS IMPORTANT FOR THE LIFE AND LONGEVITY OF THE BATTERY

CONSISTENT CHARGING

IT IS RECOMMENDED THAT YOU CHARGE YOUR BATTERIES TO THE ABSORPTION VOLTAGE AT LEAST 2 TIMES A MONTH, PREFERRED ONCE A WEEK

OUT OF BALANCE

IMBALANCE ISSUES

FAILING TO CHARGE YOUR BATTERIES ON A REGULAR BASIS CAN CAUSE IMBALANCING ISSUES, CAUSING THEM TO FALL SHORT OF PERFORMANCE IF NOT DAMAGE THEM

SMART CHARGING

WITH PASSIVE BALANCING ON THE BATTERIES, IT ALLOWS YOU TO CHARGE YOUR BATTERIES UP TO OUR RECOMMEND VOLTAGE OF 14.2-14.6V (ABSORPTION VOLTAGE), THE BMS WILL DO THE BALANCING FOR THE USER

BALANCED BATTERIES

FULLY CHARGING YOUR BATTERIES ON A CONSISTENT BASIS WILL ENSURE THAT THE MOD PACKS IN YOUR BATTERIES ARE CHARGED AND BALANCED AT THE SAME LEVEL

IN BALANCE
